
ENVISION

AUDIO/VIDEO TOUCH SCREEN TABLET

A tablet allowing deaf, hearing-impaired, and visual learners to understand and engage with scripture.

The World Health Organization estimates that approximately 466 million people around the world today have disabling hearing loss. This number is expected to grow, more than doubling by 2050. We understand that deaf and hearing-impaired individuals experience unique social, functional, emotional, and economic hurdles. But we sometimes forget that they can experience negative spiritual impacts as well. That's why MegaVoice is excited to announce the Envision: an accessible tablet for hearing-impaired and visual learners. Video material, such as the sign language Bible and The Jesus Film, are available to be loaded onto the Envision. With hours of playback on a single charge, the Envision from MegaVoice brings us one step closer to making the Bible accessible for everyone, everywhere!

SPECIFICATIONS

- Screen: 10.1" LCD IPS (1280 x 800 pixels)
- Size: 10.2 x 7.5 x 1.1" / 1.45lb
