

LIFELIGHT

SOLAR-POWERED LANTERN, AUDIO PLAYER AND RADIO

A powerful, solar-powered lantern with a built-in audio Bible player and AM/FM radio.

In dark places, light creates a sense of safety and security, making people feel welcome. The rugged LifeLight solar-powered lantern is designed to do this and so much more. As a versatile combination lantern, audio Bible player, AM/FM radio, clock, and loud speaker system via an external FM Headset transmitter¹, it is a necessity for house church congregations, summer camp workers, disaster relief crews, and missionaries in the most remote areas. The LifeLight provides much-needed light as well as life-giving messages, available in thousands of languages and dialects or loaded with your ministries content via the microSD card slot. The LifeLight has three different light functions, each with three different levels of brightness for different contexts. Use it as a lantern to fill a room or tent with light, take it on the go as a powerful flashlight, or use it as a discreet personal reading light.
