## MICROSD CARD LOCKER/UNLOCKER

### ABOUT

*Protect the content on your microSD cards with the SAFE.*

MicroSD cards are a cost-effective way to make God's Word accessible. They are lightweight and easily concealed for ministries working in creative access locations. However, most microSD cards distributed by ministries are wiped and reused. If your ministry is using microSD cards to spread the gospel, MegaVoice can help ensure your message stays SAFE! With the SAFE, you can temporarily or permanently lock microSD cards so you know they won't be wiped and repurposed.
