GETTING STARTED

User Guide for your MegaVoice Audio Player

MEGAVOICE
breaking the silence

Now that you have received a MegaVoice audio player, here's how to get started if you wish to load your own audio messages on it.

STEP 1

You will need Adobe Reader to view the recommended documents for your MegaVoice audio player. If you do not have Reader installed on your PC/Mac, please click here to download it.

STEP 2

Download a free copy of the SaberCopy software program. SaberCopy is required to load audio content to MegaVoice players. Make sure to choose the version closest to the PC computer that you have. And while you are there, you can sign up to receive email updates regarding newer versions of SaberCopy.

STEP 3

For details on how to structure your message, download the correct User Guide from our web site. Simply click on the MegaVoice audio player that you have below:

ENVOY 2 E SERIES ENVOY 2 S SERIES ENVOY E SERIES ENVOY S SERIES ENVOY CONNECT COMPANION

STEP 4

Download a document we have been working on entitled "Creating your own audio message to microSD". Although the document is still under construction, it contains valuable tips and advice to assist you in recording your own audio message as well as preparing a microSD card with it for distribution.
